Experience

- Software Engineer

Jan 2026 – Present

Longfloat Information Technology Pvt. Ltd., Dubai

 - Designed and developed **Spring Boot REST microservices** (Spring Data JPA, Hibernate, Flyway migrations) powering AI features and core backend APIs consumed by Flutter clients.
 - Implemented **stateless JWT authentication and role-based access control** with **Spring Security**, plus centralized exception handling, DTO mapping, and request validation (Bean Validation).
 - Wrote **unit and integration tests** with **JUnit 5 and Mockito**; documented endpoints with **Swagger/OpenAPI** and containerized services with **Docker** for consistent environments.
 - Architected **hardware-accelerated rendering pipelines** on Android Native (NDK/JNI), cutting UI frame-drop rate by **40%**; built **C++/JNI bridges** exposing hardware APIs to Flutter.
 - Resolved **critical memory leaks and race conditions** in production Flutter apps, reducing crash rates by **35%**.
- Software Developer

Sep 2024 – Jan 2026

Electromotion E-vidyut

 - Designed **Spring Boot backend services** for a production ride-hailing platform — trip lifecycle, fare calculation, and driver–rider matching — with layered architecture (Controller–Service–Repository).
 - Optimized **JPA/MySQL indexing and query design** for low-latency geo queries; profiled and eliminated N+1 query patterns to keep matching latency low under load.
 - Built a **Google Maps routing engine and server-side tile-caching layer**, reducing map API costs by **85%** and total infrastructure spend by over **6×**.
 - Developed **7+ native plugins** (Android/iOS) for battery, overlay display, and geolocation to support the apps.
 - Led a **5-member team** delivering **9+ production Flutter apps**, including the [Aamcha Chalak captain app](#) and [Aamcha Auto rider app](#) (Uber/Rapido-style).
 - Improved crash-free rate from **67% to 94%** via **Firebase Crashlytics**; shipped **A/B Testing, Remote Config**, and **FCM** campaigns to decouple releases from launches.
- Flutter Developer

Mar 2024 – Aug 2024

Connect 4 Digital India

 - Integrated **WebRTC P2P audio/video** (ICE/STUN/TURN, WebSocket signaling), **130+ WooCommerce REST APIs**, and **Stripe SDK** payments within Flutter apps; managed state with **BLoC**.

Personal Projects

- SalesPilot — AI-Powered Sales Outreach Suite

Spring Boot backend + Flutter client — multi-agent AI email authoring, contact capture, and multi-product campaign pipelines.

 - Built the **Spring Boot backend** — REST APIs for contacts, templates, campaigns, and send-tracking history — with **Spring Data JPA** persistence and **Gmail/SMTP** integration for one-click outreach.
 - Orchestrated **multiple AI agents** (LLM APIs) to create and edit HTML email templates — one agent drafts copy, another refines layout — with live preview before send.
 - Developed a lightweight **CRM layer to maintain client data** — an embedded in-app browser **auto-captures email IDs** from visited pages, organized into contact profiles with interaction history, deal stage, and follow-up status (Spring Data JPA, per-product segmentation).
 - Added an **AI sales advisor** that analyzes campaign performance and client engagement (opens, replies, stage drop-offs) and **recommends next actions to increase sales** — who to follow up with, when, and with which template.
 - Stack:* Spring Boot, Spring Data JPA, MySQL, Flutter, WebView, LLM APIs, Gmail/SMTP, Firebase.
- DroopIt — P2P Collaboration Platform (Chrome Extension + App)

Team workspace where friends chat, share files P2P, and an AI project manager assigns tasks and follows up on progress.

[GitHub](#) ➤

 - Built **real-time group chat** with a **Spring Boot WebSocket (STOMP) backend** — message persistence via Spring Data JPA, delivery/read receipts, and multi-room support for project teams.
 - Implemented an **AI project manager**: breaks a project goal into tasks, **assigns tasks to team members** based on workload, and **proactively follows up** for progress updates via scheduled jobs (Spring Scheduler) and FCM notifications.
 - Engineered **serverless P2P file transfer** over **WebRTC data channels** (Chrome Extension, Flutter Wasm) — chunked streaming writes supporting **files up to 1 TB**, checkpoint-based resume, SHA-256 chunk verification.
 - Stack:* Flutter (App + Wasm Extension), Spring Boot, WebSocket/STOMP, Spring Scheduler, MySQL, WebRTC, LLM APIs, FCM.

Technical Skills

Backend	Java, Spring Boot, Spring Security (JWT), Spring Data JPA, Hibernate, Spring MVC, RESTful APIs, Microservices, RabbitMQ, Flyway, Maven
Databases & Caching	MySQL, MongoDB, Redis (caching, geo queries), query optimization & indexing, Firebase (Firestore, RTDB)
Testing & DevOps	JUnit 5, Mockito, Swagger/OpenAPI, Docker, Postman, Git, GitHub Actions (CI/CD)
Mobile & Frontend	Flutter, Dart, BLoC, Riverpod, Provider, Android Native (NDK/JNI, C++), WebRTC
Other	Stripe SDK, FCM, Crashlytics, A/B Testing, Remote Config, AI Agents (LLM APIs), Figma
Problem Solving	Solved 400+ DSA problems on LeetCode and Codeforces (Java / Dart)
