B.E. Electronics & Communication · Panjab University · 2020–2024

Experience

- **Software Engineer** | **Longfloat Information Technology Pvt. Ltd., Dubai** Jan 2026 – Present
- Architected **hardware-accelerated rendering pipelines** on Android Native (NDK/JNI), cutting UI frame-drop rate by **40%** by offloading graphics operations to the GPU.
 - Built **C++/JNI bridge modules** to expose Android hardware APIs to Flutter, enabling measurable cross-platform performance gains without sacrificing portability.
 - Resolved **critical memory leaks and race conditions** in production Flutter apps, reducing crash rates by **35%**
- **Flutter Developer** | **Electromotion E-vidyut** Sep 2024 – Jan 2026
- Led a 5-member development team to deliver 9+ production Flutter apps, implementing scalable and testable state management using BLoC, Riverpod, and Provider.
 - Built the **Aamcha Chalak captain app** and **Aamcha Auto rider app** (Uber/Rapido-style) functioning as a production-ready ride-hailing app
 - **Google Maps** routing engine and tile-caching layer, reducing map API costs by **85%** and total infrastructure spend by over **6×**.
 - Improved crash-free rate from **67% to 94%** via **Firebase Crashlytics**; eliminated the top-5 ANR and fatal exception patterns through systematic root-cause analysis.
 - Shipped **A/B Testing**, **Remote Config** (OTA feature flags), and **FCM** push campaigns, decoupling releases from launches and improving user re-engagement.
 - Developed native-level Flutter plugins for battery management, overlay display (display over other apps), and geolocation, enabling boot-time initialization and foreground service support
- **Flutter Developer** | **Connect 4 Digital India** Mar 2024 – Aug 2024
- Integrated **WebRTC** for P2P audio/video, configuring ICE/STUN/TURN and WebSocket signaling for low-latency, encrypted data channels.
 - Integrated 130+ WooCommerce REST API and **Stripe SDK** payment gateway within a Flutter e-commerce app; managed state with BLoC for a high-performance UX.
- **Flutter Developer Intern** | **Outshade** Jun 2023 – Aug 2023
- Built UI components with Flutter and Figma, integrated third-party REST APIs, and enhanced Firebase push notification features.

Personal Projects

- **High-Speed P2P File Transfer Chrome Extension**
- Flutter (Wasm) Chrome extension — serverless, browser-native transfers up to 1 TB over WebRTC data channels.*
- Built a **Chrome Extension with Flutter (WebAssembly)** that opens direct **WebRTC data channels** between peers — no server relay — achieving near-link-saturation transfer speeds.
 - Designed a **streaming disk-write architecture** (chunked transfers + Web Streams API) supporting **files up to 1 TB** with zero full-payload RAM buffering.
 - **Checkpoint-based resumable transfers** with SHA-256 chunk verification ensure seamless recovery from dropped connections or browser restarts.
 - *Stack:* Flutter (Wasm), Dart, WebRTC Data Channels, JS Interop, STUN/TURN servers.
- **MultiUser Video Call — WebRTC + Firebase** GitHub ↗
- Mesh-topology multi-peer video conferencing with zero-server Firebase signaling.*
- Each joining peer auto-generates **WebRTC offers** for all existing participants via Firebase — no dedicated signaling server required.
 - *Stack:* Flutter, Firebase Realtime Database, Dart, WebRTC.
- **Full-Stack Instagram Clone — Flutter + Firebase** GitHub ↗
- Feature-complete social platform: auth, posts, likes, comments, and real-time feeds.*
- Firebase Auth, Firestore, and Storage backend; Instagram-faithful UX with infinite scroll and real-time Firestore listeners.
 - *Stack:* Flutter, Firebase (Auth, Firestore, Storage), Dart.

Technical Skills

Languages & Frameworks	Dart, Flutter, Java, C++ (NDK/JNI), JavaScript, Node.js, Express.js
Mobile & Systems	Android Native (NDK), WebRTC, BLoC, Riverpod, Provider, REST APIs
AI / ML	ML Kit, Dialogflow CX, On-Device Inference, A/B Testing
Cloud & Databases	Firebase (Auth, Firestore, RTDB, Storage, FCM, Crashlytics), MongoDB, Stripe SDK
Tools	Git, GitHub, VSCode, Figma, Postman

Achievements

- Contributed to **30+ production applications** spanning Flutter, Firebase, WebRTC, and Android Native.
- Solved **400+ competitive programming problems** on Codeforces, CodeChef, LeetCode, and GFG (Java / Dart).
- **Ranked 5,466 worldwide** in Codeforces Round 889 (Div. 2).
